1. groups by topic
2. Rating System to show n articles per topic.

Market RSS

easy /
structured

Objective:
News reader that allows a user to subscribe to a very large quantity of sources and to read only the best content from those sources, where "best" is defined both in user's preferences or article style, length, source + category / targets.

~~Article Feeds News~~

1. See topics
2. each topic has an archive
3. read 7 archive per topic instead of always

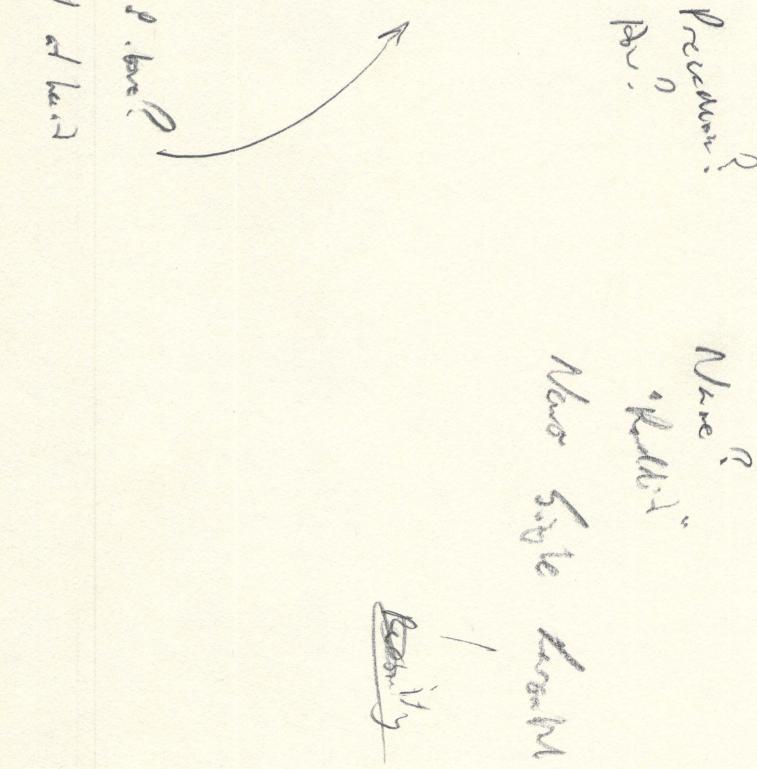

For some categories, you want to read from one source.

~~Category~~ One mode per category
if (apply) - high priority
else if (critical) - low priority

11/51/1

1. Source page
2. Java to combine several articles on XML to store

- Fetch Reader
- Ratings
 - Thumbs Up/Down
- Display
 - Shows one article in a specific topic based on previous data collected from user

- "Why did I choose this article?"
 - ↑ She also already had some topics but was chosen by program
- "New Topic (like interest etc) are attempted to be" to search based on texts in the net & similar domains (i.e. new version iPhone vs iPhone sites)
- "Comparison of Articles & Articles in the R.I."
 - Similar domain based on point such p. base?
 - must be win - within theme & at least x win threshold

in reg / recd)

A hand-drawn diagram consisting of a vertical rectangle on the left. A diagonal line starts from the top-left corner and extends to the bottom-right corner. To the right of this rectangle are five horizontal lines of varying lengths, arranged vertically from top to bottom. The first line is the longest, followed by three shorter lines, and then another longer line at the bottom.
