1. graps by topic
2. Rating System to show ?
   article per topic.

Objective:
News reader that allows
a user to subscribe to a very
large quantity of sources and
to read only the best content
from those sources, where "best" is
defined by the user's preferences
in article style, length, source +
category/tags.

~~Also graps News Sy~~

1. see topics
2. each topic has a article
3. read ? article per topic instead of digos

For some categories, you want to read
from one source.
(eg) DARING FIREBALL
   if (apple) — high priority
   else if (political) - low priority

1/15/11

1. Source forge

2. java to combine several articles in xml to groups
